

Lucie Svobodová

**bio+bio- BIO+BIO-**

**When we lie, our every cell lies, when we speak the truth, every cell is true.**

**XIV. Dalai Lama**

Is it possible that our mind affects every cell in our body? Is it possible that our mind can affect cells in someone else's` body? Is its possible that all of our cells are greeting the person that is good to us and react negatively to evil people? I am using my mental activity to influence different groups of human cells grown artificially in lab. I encourage and give love to one of the group and hate and resent the other. The video documents the whole experiment and the photographs documents its outcome. How many cells died or where not created because I was evil to them? How many cells were born and survived because of my love?

Lucie Svobodová, 1963, Accomplished Czech artist experimenting with different types of media – laser, 3D space, animations, different software and hardware, Internet, virtual reality, artificial live, digital picture and sound. She explores sound, word, static picture or movement, biofeedback, mental activity, psychotropic essences and new technologies and searches for hidden relations between new technologies and old traditions and archetypes.
